

Daksh Malhan
AI Engineer

Summary

Built AI applications with Python, FastAPI, RAG, vector search, React, and Docker.

Skills

Python, FastAPI, React, Next.js, SQL, SQLite, Docker, OpenAI API, RAG, FAISS, pytest

Projects

- Built an evidence-backed RAG chatbot using Python, FastAPI, FAISS, and the OpenAI API for document question answering.
- Created a resume scoring dashboard with React, Next.js, SQLite run history, structured logs, and pytest coverage.
- Containerized a FastAPI service with Docker and implemented REST API endpoints.

Education

Computer Science coursework in databases, machine learning, and software engineering.
